I don't have to read the news, or hear it on the radio. I can see it on the faces of all the people I know. The reason we're here is all the farms around, what's gonna happen to our little town?
I don't have to read the news or hear it on the radio. I can see it on the faces of all the people I know. The boards go up and the signs come down, what's gonna happen to our little town (Greg Brown).

Hello friends,

My last letter to you was a love letter. I try really hard to focus on love and nurture it to keep from becoming consumed with anger and rage over what is happening in our world. It's very difficult when we tend to take on the troubles of the world, as difficult today as ever. As the 2nd decade of the new millennium and the 2nd half of our folk forum music season begin, there is an overwhelming amount of chaos and injustice descending upon us. We are besieged by a storm of un-truths contrived to manipulate people thru fear, greed, self-interest, hatred, and racism, and we are pushed into an "us vs, them" view of the world.

We began the century with fraudulent elections and the horrific, incredibly suspicious 9/11 "attack on America". We stood by in shock as our own leaders launched brash and unapologetic attacks on other countries, on democracy, on the Bill of Rights, on the earth, and on reason itself. The ensuing plunder and pillage of the earth, resource grabs and wholesale economic fraud created a few super-wealthy, many deaths, and plunged the whole world into economic, political, and climactic free-fall. Perhaps we were deluded that democracy was still working. At any rate, our hopes were dashed by the realization that money in America is much more powerful than dreams of justice, altruism, and a commonwealth for all. Allowing wealth to concentrate in the possession of the least moral and most self-interested, and then giving it license to express that interest regardless of benefit to democracy or common good is dangerous to all of our loftiest ideals. Some of the most vocal advocates of unrestricted wealth, elevate it above human rights and justice. Some claim allegiance to Christian values. Many claim ownership of pro-life values while they vote for war and pollution, or help create poverty wages and reduced standard of living for working people by shipping jobs over seas and fixing low prices on farm products replacing the middle class with a new class, the working poor. Mammon, as it is called in the New Testament of the Bible, is their real master. It is the Beast served by much of America and has seduced and captured the soul of this nation. Now it reaches its tentacles to every corner of the earth.

We are surrounded by battles everywhere, bullets, bombs, malfeasance \$, or harsh words. Birds are falling from the sky. Floods of the century, droughts of the century, earthquakes, tsunamis, hurricanes, snowstorms of the century...the planet seems to be, as my carpenter friend and favorite trout fisherman Dave Dinsmore says, "trying to get rid of the human ticks". "For everything, there is a season..." and it seems this may be the

season humanity becomes clinched in battle against the Beast...and for survival.

ANGST. I first heard the term in a psych class in college. Carl Jung described it, but we all knew the feeling. Webster's describes it as "a gloomy, often neurotic feeling of generalized anxiety and depression." Do you have it? It is interesting that it is preceded in Webster's by the definition for; **an'gry young men;** "a group of young writers in Great Britain after WW II bitterly critical of upper class and middle class values and practices."

We are not alone in history. The angst and anger are still here. When I was in my 20's, the Viet Nam war was raging and for young men, if your number was up and your grades were down, you got a ticket to slog thru rice paddies and jungles saturated with agent orange, dropping grenades down holes in smoldering villages while bereaved mothers and grandmothers screamed at you in a language you didn't understand. The angst of the times went deeper than the fears of young men facing the draft. There was angst about living meaningless, misdirected lives out of sync with the planet and with the rest of humanity. Zeitgeist, "spirit of the times" was another term used a lot. There were so many parts of our world that needed to be fixed, and many had hope of fixing it. The Zeitgeist swept people along in a wave of hope and a sense of responsibility to all of humanity. It was for the most part democratic, spontaneous, and egalitarian, based on love, justice, and harmony with nature.

Today the battle rages as it did then. The powerful seek to hold onto their advantage at the expense of the meek and of the earth. It seems, given the global nature of humanity's problems and the immensity of the earth's growing instability, that there is only one big battle left and it is about to be waged. And the battles waged for power, excess, or revenge...to what end are they waged if it leaves the planet a smoldering, polluted ruin and the people set apart from each other? Concentration of wealth, especially unearned wealth, juxtaposed against hardships and poverty will create tensions that can only lead to violence, brutality, loss of freedoms and life.

We in this human family must see that we are potentially all part of the Beast or feeding it. There is a light that can guide us out, a light that comes from discovering deeper love that extends beyond self. It is love that comes from understanding our place in the larger scheme of things, immersed in the beauty of the natural world and mindful of preserving and sustaining it. Collectively, humans need to learn from the past, be gracious for its gifts, forgive its sins, and take care not to repeat them.

Be resolute, be strong, persist and resist evil. Let us defend what is good. As we begin this new decade, we look forward to listening to some great music with you in the big room at Oak Center. May we gather good medicine for the work that awaits us.

Love and peace,

Maintenance and Repair,

Earthly Notes.
